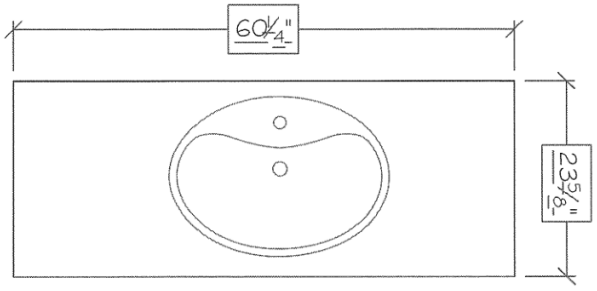
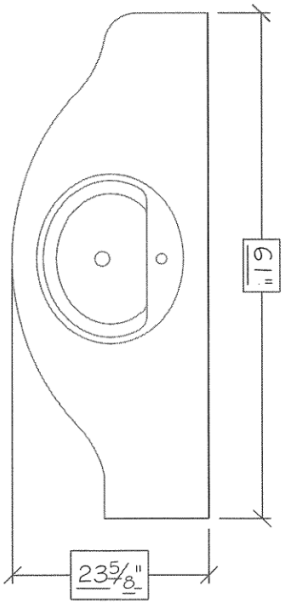
ABU DHABI / AUGUST 2011

Two shapes for a villa vanity

Plan views from the original two-page attachment circulated for a Cambria materials estimate.





The sheet shows a straight rectangular top and a curved-front alternative, each with an inset basin. Tom Rothstein forwarded the drawings to Jay Zaabri on August 11, 2011. Jay asked whether the estimate included the wall surfaces or only the bathroom fixtures.

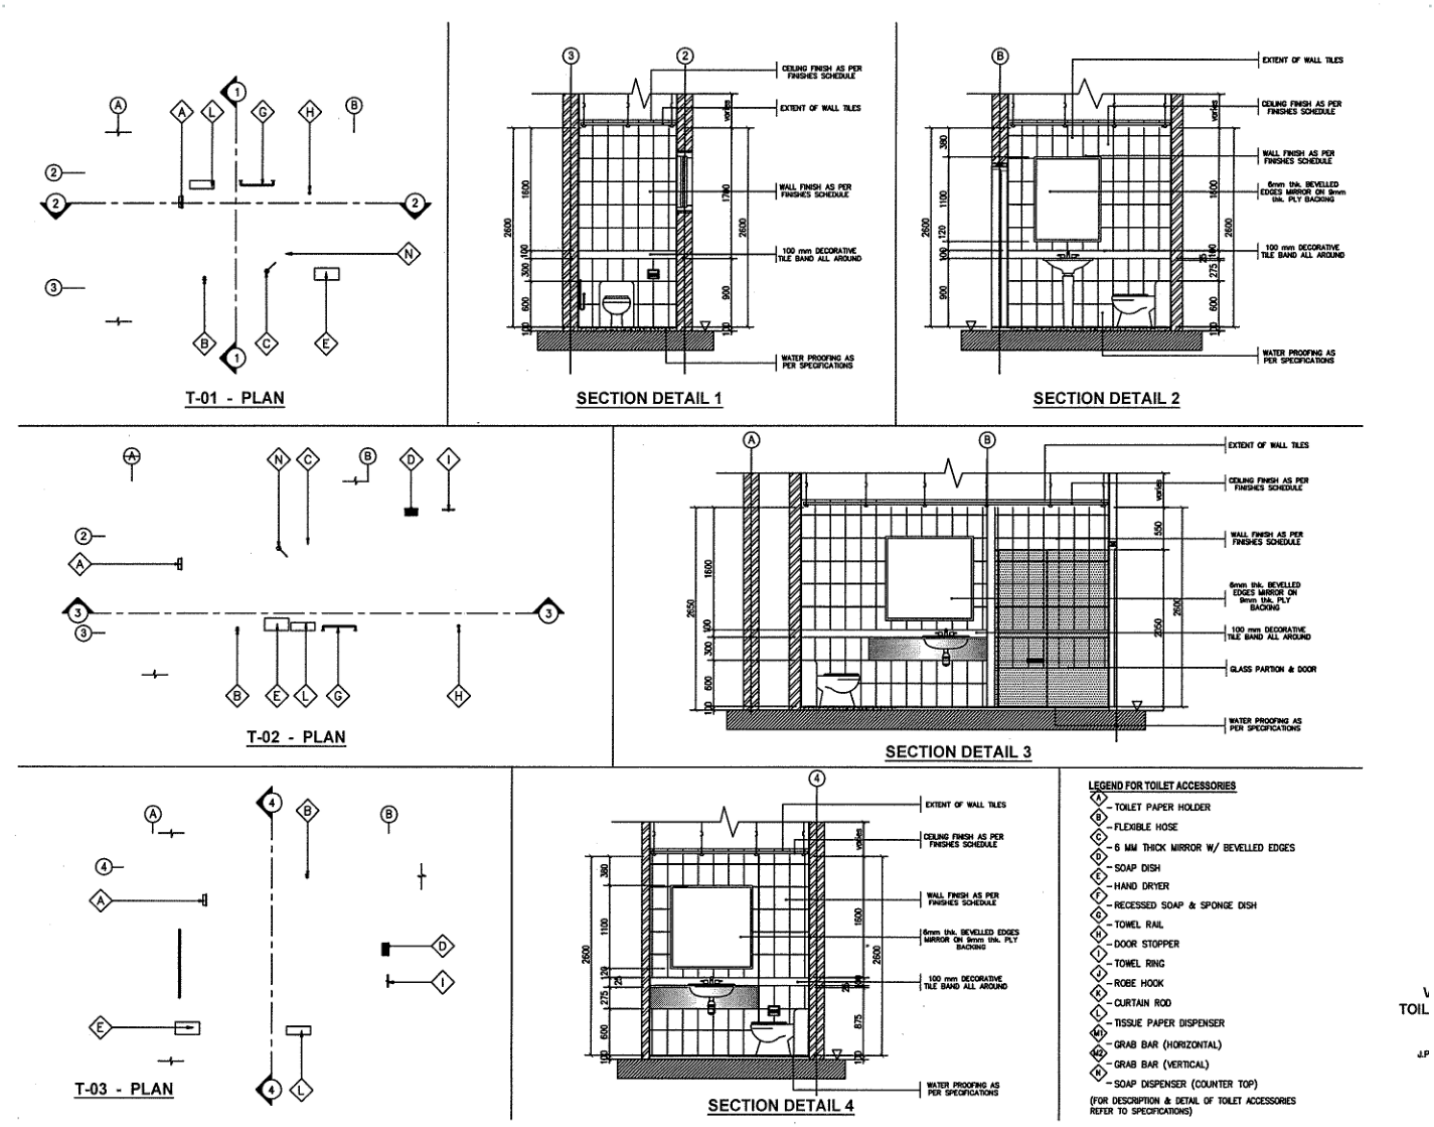
The wall elevations

Bathroom section details from the second sheet of the same estimate attachment.



The elevations show the relationship of the basin and fittings to the surrounding wall surfaces. The drawings and correspondence document design review for pricing. The archive does not establish a material purchase, installation or completed construction.

Original drawing, page 2 of 2, rotated for reading and cropped. Source archive: Jay Zaabri.
